PROJECTS

NEXON.AI | AI-Powered Utility Application
PERN Stack | GitHub | Live

- Developed AI-driven features using OpenAI API with secure backend integration and Clerk authentication.
- Designed and implemented full-stack architecture with React frontend and Node.js/Express backend, enabling real-time user interaction.

CODE STATION | Learning Platform
Django, React.js | GitHub | Live

- Built JWT authentication system with role-based access control, enabling secure login, course enrollment, and user management.
- Developed core LMS features including course creation, enrollment tracking, and interactive dashboards using React and Django REST API.

NOTEBOOK+ | Lightweight Notebook Application
React.js | GitHub | Live

- Developed a full-featured note management system with create, edit, delete, and restore functionality, backed by a safe trash-based deletion flow.
- Architected a modular component structure with persistent client-side storage via the Local Storage API, delivering an offline-friendly, responsive UI with no backend dependency.

RESEARCH

A-RICD | Lead Researcher
LLMs Research | GitHub

- Designed a single-model, LoRA-adapter-based contrastive decoding framework to mitigate LLM hallucinations, eliminating the need for two full models in memory.
- Achieved a 38.7% relative improvement in MC1 accuracy on TruthfulQA for LLaMA-2-7B-Chat over the ICD baseline, using a novel per-question dynamic alpha selection strategy.
